I walked in rainforest at
_______________ National Park

The treetop area of the forest is called the
__________________________

Plants which grow on other plants for support are called
__________________________

Plants that climb and twine are called ________________
Who am I?
I am black with red and yellow on my head.
I scratch in the leaves for grubs.
I build a mound for my eggs.
I am a ______________

Who am I?
I live in moist leaf litter and wait.
I suck blood from animals for my food.
I am a ______________

Who am I?
I have pads on my toes for good grip.
I search for insects amongst the leaves.
I am a tree ______________

Who am I?
I live in moist leaf litter and wait.
I suck blood from animals for my food.
I am a ______________
I look after rainforest because I -

- Tell people what a small amount of this kind of forest is left
- Make sure my pets are kept at home where they can’t hunt native wildlife
Many NSW rainforests are included in the Gondwana Rainforests of Australia World Heritage Area.

My class is visiting which national park?
____________________National Park

In the World Heritage symbol what do the circle and the square mean?

Research link: http://whc.unesco.org/en/emblem/

My favourite word to describe rainforest is:

Name one thing that rainforest needs to grow:

What is flora?

Name two plants which grow in the park.

Discovery for schools program, North Coast, DECCW 2010/157
Name the three layers of the Rainforest

______________________ Layer
______________________ Layer
______________________ Layer

Where do epiphytes live?

______________________

Name one epiphyte

______________________

Where do the plants living in the rainforest get their nutrients?

______________________
______________________
______________________
Which layer of the forest do these three animals live in?

Regent Bowerbird lives in ______________ Layer ____________________ Peron’s Tree Frog lives in ______________ Layer ____________________ Stag Beetle lives in ______________ Layer ____________________

Why are Australian rainforests special?
________________________________________
________________________________________
________________________________________
________________________________________

What can destroy or damage rainforest?
________________________________________
________________________________________
________________________________________
________________________________________

What are some actions we can take to help rainforest to survive?

Define rainforest by mentioning the canopy.

________________________________________

________________________________________

________________________________________

Name three types of rainforest found in NSW.

________________________________________

________________________________________

________________________________________

What does rainforest need in order to grow?

1. ______________________________________

   ______________________________________

2. ______________________________________

   ______________________________________

3. ______________________________________

   ______________________________________
On the diagram below, label the following:

- A buttress     A mid-layer tree
- The canopy layer An emergent tree
- An epiphyte     A vine
- Ground ferns     A herb

Where do the plants living in the rainforest get their nutrients?
